COMPLEAP

Learner-centered digital ecosystem of competence development

7.9.2018

COMPLEAP

Compleap is a 2-year long (12/17-11/19) EU-project funded by DG Connect as part of creating the Digital single market

Creating services for learners with learners.
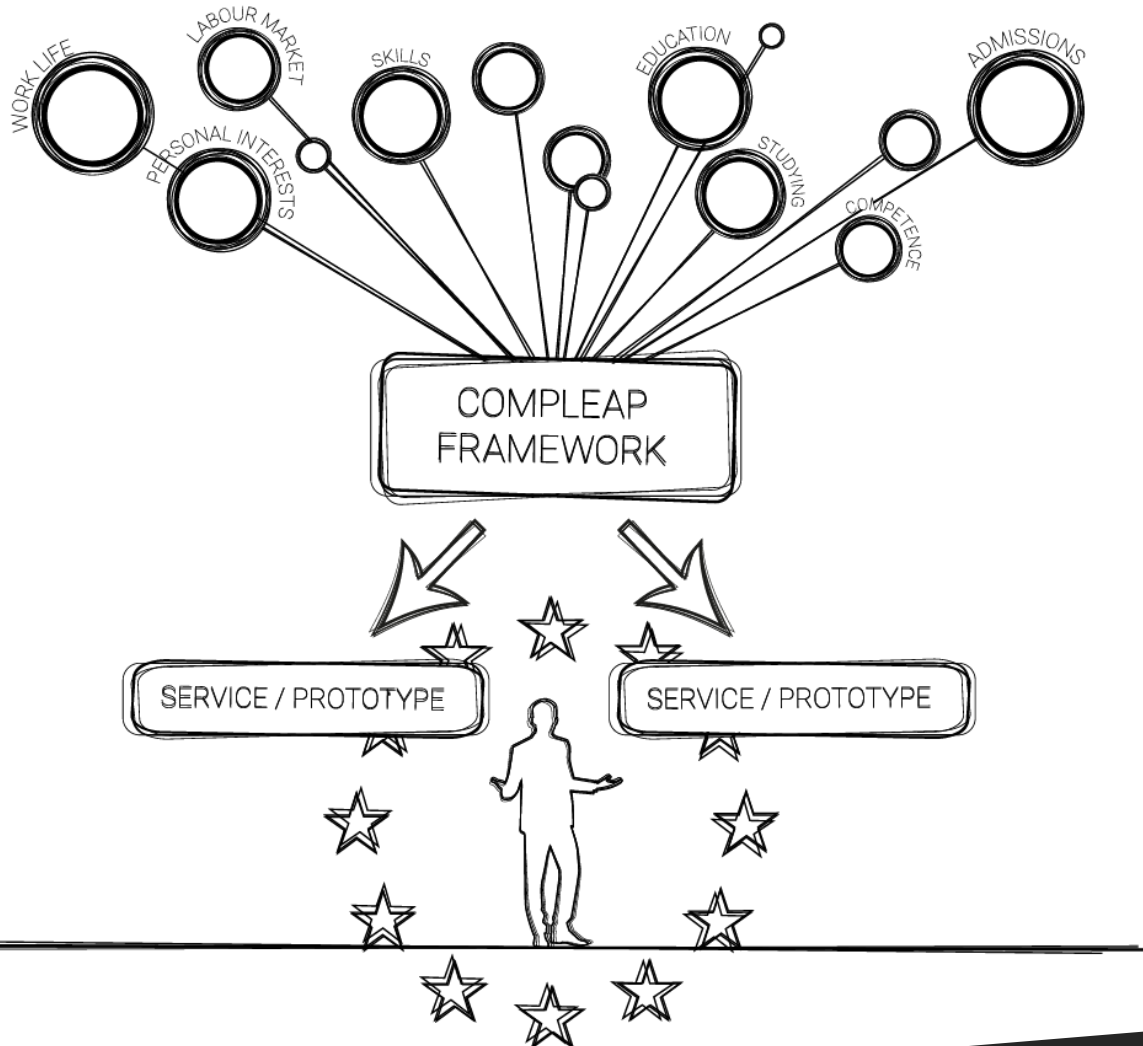

European Commission

COMPLEAP PARTNERS

WHAT ARE WE DOING?

1)   A Learner Path - personal services for users to map competences throughout their life

2)   Learning Analytics – to provide the user with insights out of data

3)   Depicting a wider service framework of digital services for competence development

COMPLEAP

DISTINCT MODULES FOR THE LEARNER PATH

The planned **Learner Path** ties together user needs for <u>identifying competences, ambitions and skills</u>, with possibilities of <u>guidance and comparing existing education opportunities</u>

CREATING A LEARNER CENTERED PATH
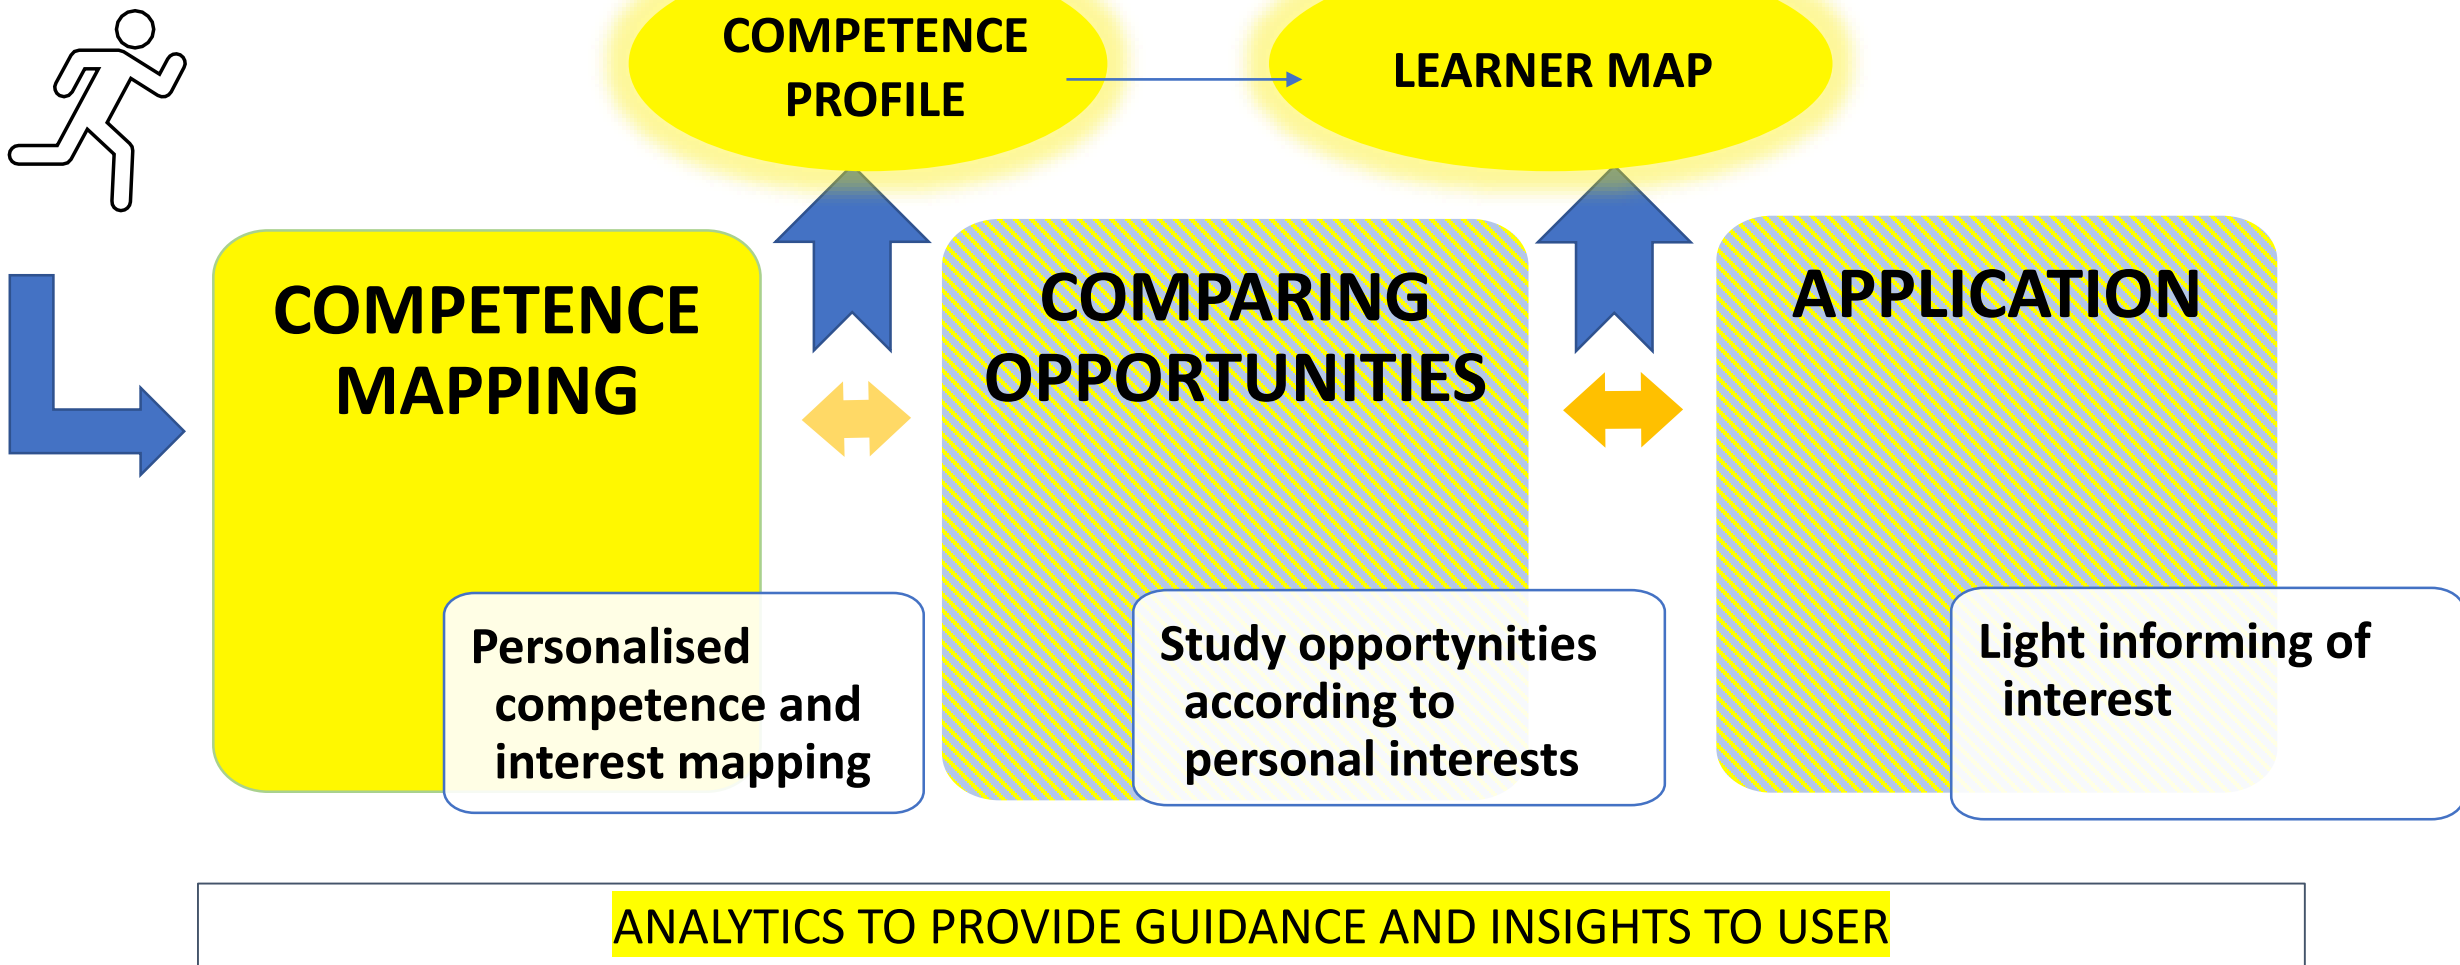

Personal Competence Profile
- Self-evaluation and automated identification of skills; non-formal and formal
- Strong identification opens access to databases and registers
- Tool for sharing and guidance

Matching and Comparing Educational Offer (using Ploteus)
- Personalised suggestions on educational opportunities in the EU based on the data from the personal competence profile

Guidance through Learner Map
- Personalised visualised map of future possibilities

COMPLEAP

ADDED VALUE FROM USING
# LEARNING ANALYTICS

COMPLEAP

Learning analytics is collection, analysis, and report of data about learning.

Digital traces of learning, user behavior and teachers' activities can be collected with the help of learning analytics tools and present the feedback for users as understandable, visualized results.

Based on the collected data, different optimizations, interventions, adaptations, personalizations or predictive models and assessments can be done. The purpose of learning analytics is to support decision-making of different stakeholders.
